EDUCATION BACKGROUND

(Ph.D.) McMaster University **Hamilton, ON, Canada**
Image/Video Restoration & 2D/3D Computer Vision & Generative AI

(M.S.) Huazhong University of Science and Technology **Wuhan, China**
Artificial Intelligence and Automation

7+ Years of Research Experience in Machine Learning & 2D/3D Computer Vision

PROFESSIONAL EXPERIENCE

3+ Years of Work Experience in Machine Learning, Deep Learning, NLP, and Computer Vision

Noah's Ark Lab, Huawei Canada **Markham, Canada**
(***Full-time***) ***Researcher*** *Sep. 2023- Present*

- Research on 4D dynamic scene generation and editing.

Amazon, US **Seattle, United States**
(***Internship***) ***Applied Scientist*** *June. 2023- Sep. 2023*

- Research on large language model and prompt tuning.
- One paper on continual prompt tuning (Submitted to ACL 2024).
- Developing attribute extraction models for product recommendation.

Noah's Ark Lab, Huawei Canada **Markham, Canada**
(***Full-time***) ***Researcher*** *Feb. 2022- June. 2023*

- Research on 3D shape reconstruction and video understanding.
- One paper on text-to-driven 3D generation (NeurIPS 2023, Paper Link)
- Winning runner-up in the ActivityNet Challenge (CVPR2022 Workshop, Video Link)
- Developing and deliver temporal action localization models (Paper Link)

NetEase Games, AI Lab **Hangzhou, China**
(***Full-time***) ***Machine Learning Engineer*** *July. 2019-Jan. 2020*

- Developing a deep motion generation model for automatic 3D digital human animation.
- Working on a neural solver for optical motion capture data cleaning and generation.

The Hong Kong Polytechnic University **Hong Kong, China**
(***Full-time***) ***Research Assistant in ME*** *Jan. 2019-July. 2019*

- Working on the system development of micro-drones.
- Developing dynamic obstacle avoidance algorithms for flying robots.

Tencent, Game AI Group **Shenzhen, China**
(***Internship***) ***Machine Learning Engineer*** *Apr. 2018-July. 2018*

- Participate in developing a multi-agent AI system of a MOBA game (Honor of Kings).

SELECTED PROJECTS

Continual Prompt Tuning for Large Language Models *Amazon, Seattle, US*

- Research on the application of prompt tuning for LLMs. We developed a queue-based continual prompt tuning method and attribute extraction models for product recommendation.

Text-driven Real-world Mesh Retexturing *Noah's Ark Lab, Canada*

- A flexible and easy-to-use text-driven tool to create and edit 3D objects from real-world images. (Two US patents, NeurIPS 2023)

Adversarial Neural Degradation for Blind Super-Resolution *McMaster University*

- We proposed a novel adversarial neural degradation model to train a super-resolution model for improving restoration performance on real-world images. (NeurIPS 2023).

Temporal Action Localization in Untrimmed Videos *Noah's Ark Lab, Canada*

- A flexible and easy-to-use text-driven tool to create and edit 3D objects from real-world images. (One US patent, winning second prize in CVPRW 2022)

Degradation-Invariant Image Representation Learning *McMaster University*

- A deep degradation-independent representation learning method for robust image restoration.

Monitor-Induced Data Collection for Image Restoration *McMaster University*

- We proposed an automatic system for real-world super-resolution data collection (TIP 2022).

Solving a Parametric Image Restoration Problem *McMaster University*

- We proposed a novel system called functional neural network (FuncNet) to solve a parametric image restoration problem with a single model. (NeurIPS 2021)
