EDUCATION BACKGROUND

(Ph.D.) **McMaster University**

Image/Video Restoration, 2D/3D Computer Vision, and Generative AI

Hamilton, ON, Canada

Jan.2020 - Jan.2024

(M.S.) **Huazhong University of Science and Technology**

Artificial Intelligence and Automation

Wuhan, China

Sep.2017 - June.2019

7+ Years of Experience in Machine Learning & 2D/3D Computer Vision

PROFESSIONAL EXPERIENCE

3+ Years of Industry Work Experience in Machine Learning, DL, NLP, and Computer Vision

Noah's Ark Lab, Canada

(Full-time) Researcher

Markham, Canada

Sep. 2023- Present

- Research on 4D dynamic scene editing.
- Research on text-to-image and text-to-video diffusion models.

Amazon, US

(Internship) Applied Scientist

Seattle, United States

June. 2023- Sep. 2023

- Research on large language model and prompt tuning.
- One paper on continual prompt tuning (Submitted to ACL 2024).
- Developing attribute extraction models for product recommendation.

Noah's Ark Lab, Canada

(Full-time) Researcher

Markham, Canada

Feb. 2022- June. 2023

- Research on 3D shape reconstruction and video understanding.
- One paper on text-to-driven 3D generation (NeurIPS 2023, [Paper Link](#))
- Winning runner-up in the ActivityNet Challenge (CVPR2022 Workshop, [Video Link](#))
- Developing and delivering temporal action localization models ([Paper Link](#))

NetEase Games, AI Lab

(Full-time) Machine Learning Engineer

Hangzhou, China

July. 2019-Jan. 2020

- Developing a deep motion generation model for automatic 3D digital human animation.
- Working on a neural solver for optical motion capture data cleaning and generation.

The Hong Kong Polytechnic University

(Full-time) Research Assistant in ME

Hong Kong, China

Jan. 2019-July. 2019

- Working on the system development of micro-drones.
- Developing dynamic obstacle avoidance algorithms for flying robots.

Tencent, Game AI Group

(Internship) Machine Learning Engineer

Shenzhen, China

Apr. 2018-July. 2018

- Participate in developing a multi-agent AI system of a MOBA game (Honor of Kings).

SELECTED PROJECTS

Continual Prompt Tuning for Large Language Models

Amazon, Seattle, US

- Research on the application of prompt tuning for LLMs. We developed a queue-based continual prompt tuning method and attribute extraction models for product recommendation.

Text-driven Real-world Mesh Retexturing

Noah's Ark Lab, Canada

- A flexible and easy-to-use text-driven tool to create and edit 3D objects from real-world images. (Two US patents, NeurIPS 2023)

Adversarial Neural Degradation for Blind Super-Resolution

McMaster University

- We proposed a novel adversarial neural degradation model to train a super-resolution model for improving restoration performance on real-world images. (NeurIPS 2023).

Temporal Action Localization in Untrimmed Videos

Noah's Ark Lab, Canada

- A flexible and easy-to-use text-driven tool to create and edit 3D objects from real-world images. (One US patent, winning second prize in CVPRW 2022)

Degradation-Invariant Image Representation Learning

McMaster University

- A deep degradation-independent representation learning method for robust image restoration.

Monitor-Induced Data Collection for Image Restoration

McMaster University

- We proposed an automatic system for real-world super-resolution data collection (TIP 2022).

Solving a Parametric Image Restoration Problem

McMaster University

- We proposed a novel system called functional neural network (FuncNet) to solve a parametric image restoration problem with a single model. (NeurIPS 2021)
